**Important features:****Signal peptide:**

amino acids 1-17

**Transmembrane domains:**

amino acids 101-123, 189-211

**N-glycosylation sites.**

amino acids 172-176, 250-254

**cAMP- and cGMP-dependent protein kinase phosphorylation site.**

amino acids 240-244, 261-265

**N-myristoylation site.**

amino acids 13-19, 104-110, 115-121, 204-210

**Amidation site.**

amino acids 27-31

**Prokaryotic membrane lipoprotein lipid attachment site.**

amino acids 4-15

**Protein splicing proteins.**

amino acids 25-31

**Sugar transport proteins.**

amino acids 162-172

**FIGURE 19**

**Important features:****Signal peptide:**

amino acids 1-22

**Cell attachment sequence.**

amino acids 254-257

**Nt-dnaJ domain signature.**

amino acids 67-87

**Homologous region to Nt-dnaJ domain proteins.**

amino acids 26-58

**N-glycosylation site.**

amino acids 5-9, 261-265

**Tyrosine kinase phosphorylation site.**

amino acids 253-260

**N-myristoylation site.**

amino acids 18-24, 31-37, 93-99, 215-221

**Amidation site.**

amino acids 164-168

### Important features:

**Transmembrane domains:**

amino acids 12-30 (typeII), 33-52, 69-89 and 93-109

N-myristoylation sites.

amino acids 11-16, 51-56 and 116-121

**Aminoacyl-transfer RNA synthetases class-II protein.**

amino acids 49-59

### **Important features:**

#### **Signal peptide:**

amino acids 1-29

#### **Transmembrane domain:**

amino acids 230-255

#### **N-glycosylation sites.**

amino acids 40-43 and 134-137

#### **Tissue factor proteins homology.**

amino acids 92-119

#### **Integrins alpha chain protein homology.**

amino acids 232-262

117/330 4394550

**Signal Peptide:**

amino acids 1-22

### Transmembrane Domains:

amino acids 140-161, 213-229, 312-334

**Putative AMP-binding Domain Signature:**

amino acids 260-271

**N-myristoylation Sites:**

amino acids 19-24, 22-27, 120-125, 203-208, 268-273, 272-277,  
314-319, 318-323, 379-384, 380-385, 409-413

**N-glycosylation Site:**

amino acids 282-285

**Important features of the protein:****Signal peptide:**

amino acids 1-24

**Transmembrane domain:**

amino acids 339-362

**N-glycosylation sites.**

amino acids 34-37, 58-61, 142-145, 197-200, 300-303 and 364-367

| Category               | Item                     | Value                           |
|------------------------|--------------------------|---------------------------------|
| 1. General Information | Name                     | John Doe                        |
|                        | Age                      | 35                              |
|                        | Gender                   | Male                            |
|                        | Occupation               | Software Engineer               |
|                        | Education                | Master's Degree                 |
|                        | Marital Status           | Single                          |
|                        | Address                  | 123 Main St, New York, NY 10001 |
|                        | Phone Number             | (212) 555-1234                  |
|                        | Email Address            | john.doe@example.com            |
|                        | Emergency Contact        | Jane Doe, (212) 555-5678        |
| 2. Employment History  | Company Name             | ABC Corp.                       |
|                        | Position                 | Senior Software Engineer        |
|                        | Start Date               | 2018-01-15                      |
|                        | End Date                 | 2020-03-31                      |
|                        | Reason for Leaving       | Job Completion                  |
|                        | Supervisor               | Mr. Smith                       |
|                        | Key Projects             | Project X, Project Y            |
|                        | Skills Acquired          | Python, JavaScript, React       |
|                        | References               | Mr. Smith, (212) 555-9999       |
|                        | Recommendation           | Excellent                       |
| 3. Education Details   | Institution              | University of New York          |
|                        | Degree                   | Master of Science               |
|                        | Field of Study           | Computer Science                |
|                        | Start Date               | 2015-09-01                      |
|                        | End Date                 | 2017-05-31                      |
|                        | Thesis Topic             | Advanced Algorithms             |
|                        | Advisor                  | Dr. Brown                       |
|                        | Grades                   | A, B, C                         |
|                        | Recommendation           | Very Good                       |
|                        | Additional Info          | Graduated with Honors           |
| 4. Skills Assessment   | Programming Languages    | Python, JavaScript, Java        |
|                        | Frameworks               | React, Node.js, Spring          |
|                        | Tools                    | Git, Docker, Kubernetes         |
|                        | Soft Skills              | Teamwork, Communication         |
|                        | Problem Solving          | Strong                          |
|                        | Leadership               | Good                            |
|                        | Time Management          | Excellent                       |
|                        | Adaptability             | High                            |
|                        | Continuous Learning      | Yes                             |
|                        | Overall Rating           | 4.5/5                           |
| 5. Personal Interests  | Hobbies                  | Reading, Hiking, Coding         |
|                        | Favorite Books           | The Great Gatsby, 1984          |
|                        | Favorite Movies          | Inception, The Matrix           |
|                        | Favorite Music           | Rock, Jazz                      |
|                        | Favorite Sports          | Soccer, Basketball              |
|                        | Travel Preferences       | Europe, Asia                    |
|                        | Volunteer Work           | Local Food Bank                 |
|                        | Charitable Contributions | Red Cross                       |
|                        | Future Goals             | Start a business                |
|                        | Signature                | John Doe                        |

**Signal Peptide:**

amino acids 1-22

**Transmembrane Domain:**

amino acids 429-452

**N-glycosylation sites:**

amino acids 101-104, 158-161, 292-295, 329-332, 362-365, 369-  
372, 382-385, 389-392

**Somatomedin B Domain:**

amino acids 69-85

**Sulfatase protein Region:**

amino acids 212-241

204/330

**Important features:****Signal peptide:**

amino acids 1-16

**Transmembrane domain:**

amino acids 284-304, 339-360, 376-394

**Mitochondrial energy transfer proteins signature.**

amino acids 206-215, 300-309

**N-glycosylation site.**

amino acids 129-133, 169-173

**Elongation Factor-hand calcium-binding protein.**

amino acids 54-73, 85-104, 121-140

**Important features:****Signal peptide:**

amino acids 1-20

**Transmembrane domains:**

amino acids 105-123, 138-156, 169-185, 193-209, 221-240, 256-272

**N-glycosylation site.**

amino acids 40-44

**N-myristoylation site.**

amino acids 43-49

**CUB domain proteins profile.**

amino acids 285-302

**Amiloride-sensitive sodium channels proteins.**

amino acids 162-186

**Important features:**

**Signal peptide:**

amino acids 1-18

**Tyrosine kinase phosphorylation site.**

amino acids 36-45

**N-myristoylation site.**

amino acids 33-39, 59-65

**Amidation site.**

amino acids 90-94

**Leucine zipper pattern.**

amino acids 43-65

**Tachykinin family signature.**

amino acids 86-92

### Important features:

**Signal peptide:**

amino acids 1-25

N-glycosylation site.

amino acids 76-80, 92-96, 231-235, 289-293, 378-382, 421-425

Beta-transducin family Trp-Asp repeat protein.

amino acids 30-47, 105-118, 107-119, 203-216, 205-217, 296-308

**FIGURE 265**

### **Signal peptide:**

amino acids 1-21

### **Putative transmembrane domains:**

amino acids 284-300, 617-633

### **Leucine zipper pattern.**

amino acids 469-491, 476-498

### **N-glycosylation site.**

amino acids 20-24, 75-79, 340-344, 504-508, 542-546, 588-592,  
628-632, 811-815, 832-836, 837-841, 852-856, 896-900

### Important features of the protein:

**Signal peptide:**

amino acids 1-24

**cAMP- and cGMP-dependent protein kinase phosphorylation site.**

amino acids 175-179

N-myristoylation site.

amino acids 33-39, 100-106, 225-231, 229-235

## HBGF/FGF family proteins

amino acids 73-124

### Important features:

**Signal peptide:**

amino acids 1-17

**Transmembrane domain:**

amino acids 248-269

N-glycosylation site.

amino acids 96-99

**Fibrinogen beta and gamma chains C-terminal domain.**

amino acids 104-113

Ig like V-type domain:

amino acids 13-128
